Patent Appl. No. To be assigned
Filing Date: October 31, 2003

Application of D'Agosto, *et. al.*
Atty. Docket No. 02158.0410.NPUS00

CLAIMS

1.   A system and method for producing a telephone conference record, the method comprising the steps of:

detecting when the user has called a recorder port;

opening a call record and recording the telephone call when the user is connected to a recorder port;

detecting when the user's telephone line is disconnected; and

stop recording and close the call record if the user's telephone line is disconnected.

2.   The system and method of claim 1, further comprising capturing the calling line identification associated with the user if the user has called a recorder port.

3.   The system and method of claim 1, wherein the user calls another party prior to calling the recorder port.

4.   The system and method of claim 1, wherein the user calls another party after calling the recorder port.

5.   The system and method of claim 1, wherein the recorder port is associated with a PBX.

6.   The system and method of claim 5, wherein the user is associated with the PBX.

7.   The system and method of claim 5, wherein the recorder port is one of a plurality of recorder ports associated with the PBX, and wherein the call to a recorder port may be connected with any of the plurality of recorder ports not recording at that time.

8.   The system and method of claim 7, wherein the user is associated with a hunt group that is configured to only a distinct subset of the plurality of recorder ports.
